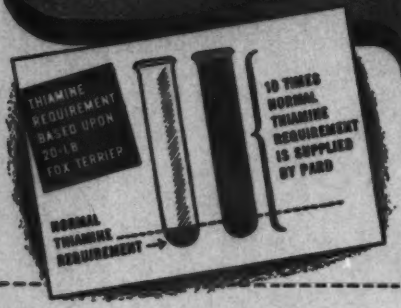
Actual tests show Pard supplies many times the B-Complex requirements for dogs!



The chart shows the amount of Thiamine—an important part of the B-Complex family—required to maintain optimum dog health in a 20-lb. Wire-Haired Fox Terrier. It also shows the abundancy of this vitamin in Pard.

B-COMPLEX CONTENT OF PARD

Based on the requirements of a 20-lb. Wire-Haired Fox Terrier.

THIAMINE—Pard supplied up to 10 times normal requirement.

RIBOFLAVIN—Pard supplied up to 40 times normal requirement.

NIACIN—Pard supplied up to 20 times normal requirement.

PANTOTHENIC ACID—Pard supplies more than 4 times normal requirement.

OTHER B-COMPLEX FACTORS—Pard is rich in the lesser known B factors such as Pyridoxin, important in protein metabolism, Choline and others.

Laboratory Kennel studies are just another step by Swift & Company to assure dogs better health through better foods. Careful quality-supervision is maintained in its manufacture to guarantee uniformity in nutrient content, taste, color, odor and texture. Pard is an easy-to-feed nourishing food that dogs love from the very first sniff and never tire.

The Pard formula is rich and appetizing and includes wholesome foods dogs need . . . a well-balanced formula, rigidly adhered to and nutritionally excellent. Pard contains every known essential for good nutritional health.
